Nebula Dual Air Fryer 1700W

The Nebula Dual Air Fryer is a healthier alternative to traditional deep-frying. Featuring a matte finish, this air fryer complements a wide range of kitchen appliances. The rapid air circulation technology ensures minimal effort during cooking and no oil is required. Reduce your energy consumption and streamline your cooking process.

Whether you enjoy cooking chips, chicken, sausages, steak, or fish, a LED touch screen display offers you a wide selection of options.

- Dual Tray
- LED Touch Panel
- Automated Presets
- Custom Time/Temp

RT-5001X 700W Specification

Power:	1700W
Size:	38.9 x 42.8 x 31.8cm
Capacity:	4.5 litres (x2)
Temperature:	Up to 200 °C
Auto Preset Controls:	10 options available

Cooking Presets

On the air fryer's digital display panel, there are a number of presets you can choose from. This chart provides a general guide to the recommended temperatures and times for various ingredients.

Chips	200 °C 15 minutes
Bread	160 °C 30 minutes
Drumsticks	200 °C 20 minutes
Fish	160 °C 20 minutes
Shrimp	160 °C 20 minutes
Steak	180 °C 20 minutes
Chicken	200 °C 20 minutes
Sausages	160 °C 15 minutes
Pizza	170 °C 20 minutes
Bacon	160 °C 15 minutes

Before serving, please ensure that the food has been thoroughly cooked and is piping hot. Please note that the above is only a guideline for cooking times. It is important to note that these may vary depending on the weight and type of contents. Depending on the ingredients, you can also choose a custom temperature/time.

Before Operation

THE NEBULA DUAL AIR FRYER MUST BE USED IN ACCORDANCE WITH THE INSTRUCTIONS AND SAFETY ADVICE.

- Do not remove the outer casing or components containing electrical/heating elements.
- In order to prevent electrical shock and short circuits, liquids should not come into contact with socket components or electrical components.
- To prevent any contact with the heating element, make sure all ingredients are correctly placed in the tray(s).
- Do not cover the air inlet/outlets when in operation.
- Filling the drawer with excessive amounts of oil can cause a fire hazard (use spray oil).
- The device may be hot when in operation, so be careful when touching it.
- Ensure voltage specification matches your primary voltage. Contact us if the power cord shows signs of wear/damage: sales@nebula-appliances.com

- The air fryer should be placed on a flat, level surface at all times during operation.
- Only home use is permitted with this device. The product is not designed for commercial use.
- There is an approximate wait time for the device. After use, allow 30 minutes for the system to cool down before cleaning.
- After the countdown has ended, the device shuts down automatically. The air fryer can be turned off by the power button manually. After 20 seconds, the device automatically shuts down.
- All electromagnetic field (EMF) standards have been met by this device.

Instructions for use:

1. Before using the air fryer, remove any stickers or outer packaging.
2. Use hot water, detergent, and non-abrasive sponges to thoroughly clean the air fryer basket drawers.
3. Clean the inside and outside with a clean cloth. If you wish to use oil, we only recommend a light spray oil if necessary.
